

To be or not to be Charlie?

The impact of group affiliation on the processing of others' emitted social signals

Grèzes, Julie

PUBLICATION DATE

4/29/2015

ABSTRACT

The Brains that pull the Triggers. 1st Conference on Syndrome E, Paris IAS, 28-29 April 2015

Minimal group procedure

Here we assigned participants to their group using drawing lots

You belong to the Green Group

You belong to the Blue Group

Participants' levels of identification, appreciation, pride of belonging to and commitment toward the group were higher toward in-group as compared to out-group members (all ts(19)>2.60, all p<0.02).
